Collegedunia Connect 3.0

Collegedunia Connect is a forum to celebrate the thought leaders in the Education System and enable Industry leaders to ideate and discuss current & upcoming trends/ issues in the Education Sector.

With the objective of promoting innovations in education leading to an improved Indian education ecosystem, this year Collegedunia, is set to organise its Third Chapter - Collegedunia Connect 3.0 with the theme **Innovation in Education: The Key to Transforming India**. The one-day event will be attended by policymakers, government officials & private sector veterans of the Industry.

The Components

- 1 Panel Discussions
- 2 Keynote Addresses
- 3 Publications - White Paper Launch
- 4 Awards & Recognitions

Previous Editions

Chennai 2021

The Journey of Collegedunia Connect started in 2021 with the Chennai Chapter with productive discussions centred around the **Impact of the Pandemic on Higher Education**.

📅 19th March 2021

📍 ITC Grand Chola, Chennai

Delhi 2022

With the Delhi Chapter, we aligned ourselves with the Government of India's action plan "**Vision India @2047**", with the theme '**Reimagining Education in India @100 Year**', our intent was to create a roadmap for the education sector. It involved constructive discussions around topics like Skills of the Future, Hybrid Model of Education and Inclusive system of education

📅 16th December 2022

📍 Le Meridien, New Delhi

Gujarat 2022

With the Gujarat Chapter, we had productive discussions around the '**Vision for Higher Education in Gujarat @2047**', addressing the challenges and opportunities for the Gujarat Education System like Encouraging Start Up & Innovation in Higher Education and Plugging the Brain Drain

📅 23rd December 2022

📍 ITC Narmada, Ahmedabad

Theme

Chapter 3 : Innovation in Education :The Key to Transforming India

With the launch of our Third Chapter this year, we aim to contribute to the Innovation Era of massive change in the Indian educational system.

The Indian Education System is undergoing a huge paradigm shift from the conventional chalk and talk model of learning to modern digital learning and from passive learning to hands-on experiential learning, which can be largely attributed to the Innovation in Education.

Addressing the **108th Indian Science Congress**, Prime Minister Narendra Modi said “If the country takes initiative in futuristic areas we will be in a position to lead Industry 4.0”.

In the pursuit of the **Government Of India’s vision for ‘Transforming India’**, the Ministry of Education has launched several new schemes, for instance: **a five-year vision plan named Education Quality Upgradation and Inclusion Programme (EQUIP)**, **SWAYAM 2.0**, **Deeksharambh**, **PARAMARSH**, and **MOE’s Innovation cell**, among other major Initiatives.

& Many More...

Prof. Abhishek Mishra
 Former State Cabinet
 Minister
 Prof. IIM – Ahmedabad

"We need to embrace the ideas that float the boat, and get rid of the ones that don't work out well; but experiments and patience for results need to be constant. Globalization, Exponential Technological Change, and Climatic Change are the three main criteria for efficient growth. An entrepreneurial mindset is important in today's generation. The concept of open learning has become the need of the hour, where a student can take up courses based on his interests, and get awarded a degree accordingly."

"Teaching is quintessential, and we need to adapt with the new ways. The younger generation is more receptive to the new ways involving technology, considering the advancements happening. The various Initiatives by the PM Modi government have been focused to keep pace with the new mindsets of the world and dedicated to improving the education sector with Its New Education Policy 2020."

Shri Jaswant Singh Saini
 State Minister, Industrial
 Development (Govt. of UP)

Shri Mridul Kumar (IFS)
 Add. Secretary
 Ministry of External Affairs

"The Ministry of Education has taken tremendous measures with the NEP to reform the Indian Education System. We had always been focused on creating an environment where clearing the exam is more important than the learning, while the focus should be vice-versa. The Education System in other countries lays more focus on the interest and passion of the student, and it is high-time that we create an ecosystem that resonates with these interests of the students to create a better society."

"With the growth in the society, criminal activities are also evolving. To cope up with this, technology is being used to impart awareness among the masses. School students become the target for achieving the impartial goal for spreading this awareness. They are the future, and a safe and valuable mindset needs to be imparted to them. Technology does play a major role in spreading this awareness, which in turn helps in making the world, a better place to live in."

Prof. K.K Aggarwal
 Former Chairman,
 National Board of
 Accreditation (NBA)

Dr. S S Mantha
 Former Chairman,
 AICTE

"Teachers should be more focused on upliftment of student's persona and sensitivity. Automation of jobs might be a bane for the bottom strata, and can be resolved by skill development and upliftment of people in that frustum."

"Sustainability and culture go hand-in-hand with job and career prospects of education, and are a necessity to build a better nation for tomorrow. Culture and Values need to be embedded by the Institutions in the education curriculum."

Prof. P. B. Sharma
 Vice Chancellor,
 Amity University

Ms. Ira Singhal (IAS)
 Deputy Commissioner,
 Office of Divisional
 Commissioner
 Delhi

"The process of selection in Civil Services has evolved over the years. Presence of professionally qualified people in the Services has provided a centerstage for growth. In order to integrate the top talent to utilise technology, they engage with all stakeholders, they invite tenders for knowledge partners also. They are open to the public providing suggestions and they work with NGOs as well. There are some of the barriers faced by civil servants in implementing new technology, like limited Financial resources, Manpower shortage, People's reluctance to change. We work under the ambit of rules and these rules are getting changed. So with that the role of civil servant changes automatically."

"The role of Civil Servants has witnessed a tremendous change in the last 75 years. The job that focuses on policy formulation and implementation in today's time was limited to revenue collection during the British era. It is required to understand the emerging trends in the Education system, for which the support of the private sector is required. The private sector can be involved in content creation, curriculum development and effective delivery etc. For instance Delhi Government, in public private partnership, has launched skill building and Entrepreneurship University."

Mr. Bhupesh Chaudhary (IAS)
 Director,
 Higher Education
 Government of Delhi

CHAPTER 3.0

"We are required to understand NEP, the focus should be on increasing the employability of the students by imparting job ready skills, on job training and including apprenticeship programs in the course curriculum."

Smt. Anju Sharma (IAS)
Principal Secretary,
Labour & Employment
Department
Government of Gujarat

Dr. Devanshu Patel
President,
Parul University

"In order to promote startups in India, we should create a culture to think in a positive way and should create an ecosystem with that. It requires a dedicated infrastructure with 24*7 manpower to support students and Educational summits to encourage thought leadership."

"The education system is heading towards a digital learning multidisciplinary and transdisciplinary approach, where practice and implementation of technical advancements is required."

Dr. Ravendra Kumar Sinha
Vice Chancellor,
Gautam Buddha
University

Dr. Navin Sheth
Vice Chancellor,
Gujarat Technological
University

"We are killing the idea and creativity in education, this is the hard fact of higher education. And the Good thing is that the maximum number of startups are registered from Gujarat only."

"Continuous learning is the way to go. Learning never stops, and technology has given us a platform to embrace that learning. Online learning is not a replacement to the classic teaching system, but it sure is an accompaniment to the offline teaching methods. AR/VR Gaming can help reduce the confinement of teaching to a single classroom."

Dr. Madhu Chitkara
Pro Chancellor,
Chitkara University

Dr. M. N Patel
Former Vice Chancellor,
Gujarat University &
Former Member Secretary,
Admissions Committee for
Professional Courses,
Gujarat

"Issues with startup is when it was introduced people were not aware of it. Only talking about it will not materialise things. It will need funding. Govt should support by giving funds. Events should be organised to promote the culture of innovation & startup. Universities can support by providing holistic development to the students. Students should be taught what they want to learn. To improve this, online education should be encouraged."

"The under-utilised infrastructure of colleges can be utilised in a hybrid-learning model. Only EdTech is not going to help the students in the longer run; hands-on experience is also needed."

Prof. Sudhir Kumar Barai
Director, BITS Pilani

Mr. Vishal Khurma
Chief Executive Officer,
Woxsen University

"Social Entrepreneurship is a necessity for today. We see a lot of entrepreneurship rising up, but the impact it leaves on society always becomes a secondary criteria, whereas it needs to be the primary focus."

Collegedunia Connect 2.1: Gujarat Chapter

23 Dec 2022 | by ITC Karnataka, Ahmedabad

Collegedunia Connect 2.1 Gujarat Chapter is a Higher Education Summit celebrating thoughtful leaders and change-makers in the educational space. It brings together key stakeholders including policymakers, educators, industry leaders to deliberate upon strategies and share best practices for building the 21st-century education system. The theme for CD Connect 2.1 is the vision for **Higher Education in Gujarat 2047**. It will feature discussions around Learning Education, Education Technology, Innovation in Education Systems, Future Skills, and Inclusivity. It will be held on **23rd December, 2022, at ITC Karnataka, Ahmedabad**.

The event will have some productive discussions revolving around the state's education system in 2047 where India have HRD as an independent nation. The vision of the President of India, Shri. Narendra Modi, and Prime Minister, Shri. Narendra Modi, will be the focus of the event. The event will also feature a panel discussion on the theme of 'Higher Education in Gujarat 2047'.
